

#SUCCESSSTORY

For each new venture that we have entered, I have spent endless hours after class with my tutors trying to implement what's learnt in class to the business also help identify possible risks and factors that can only be achieved through experience and expertise that they have.

The enterprise course has helped me realise my true potential in many ways. Before the course I believe My vision and focus was not channeled appropriately.

This course has helped me grow as a more holistic entrepreneur and hopefully one that is destined for success.

#SUCCESSSTORY

When I joined Podar, I was already doing well with my own firm and also was on path to take over my family's VC firm. I started off my journey just as clueless as the rest of my classmates, if not more because I wasn't sure where this course would benefit me.

The first month in and I knew I had made the right decision by taking this course. The tutors were aware of my work situation and helped me manage both without one affecting the other.

I was not satisfied with how the firm was running and my tutors helped me through in each step of the way. In the past couple of years with the guidance of my tutors and help of my dedicated staff, we have grown almost two folds even during covid times. This was an immense achievement for myself but I cannot take all the credits for it.
